Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for New York City, the five boroughs, and the 55 Public Use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

For important information about ACS and using multi-year estimates go to: <http://www.nyc.gov/html/dcp/html/census/popacs.shtml>.

All people	14.2%	1.7	(X)	(X)

Source: U.S. Census Bureau, 2006-2008 American Community Survey

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).
